

„Get dynamic!“ E-education tools and e-services to reach the users

Martin Brändle, Engelbert Zass
Chemistry Biology Information Center
ETH Hönggerberg, HCI
8093 Zürich, Switzerland

Virtual library

„Digital libraries

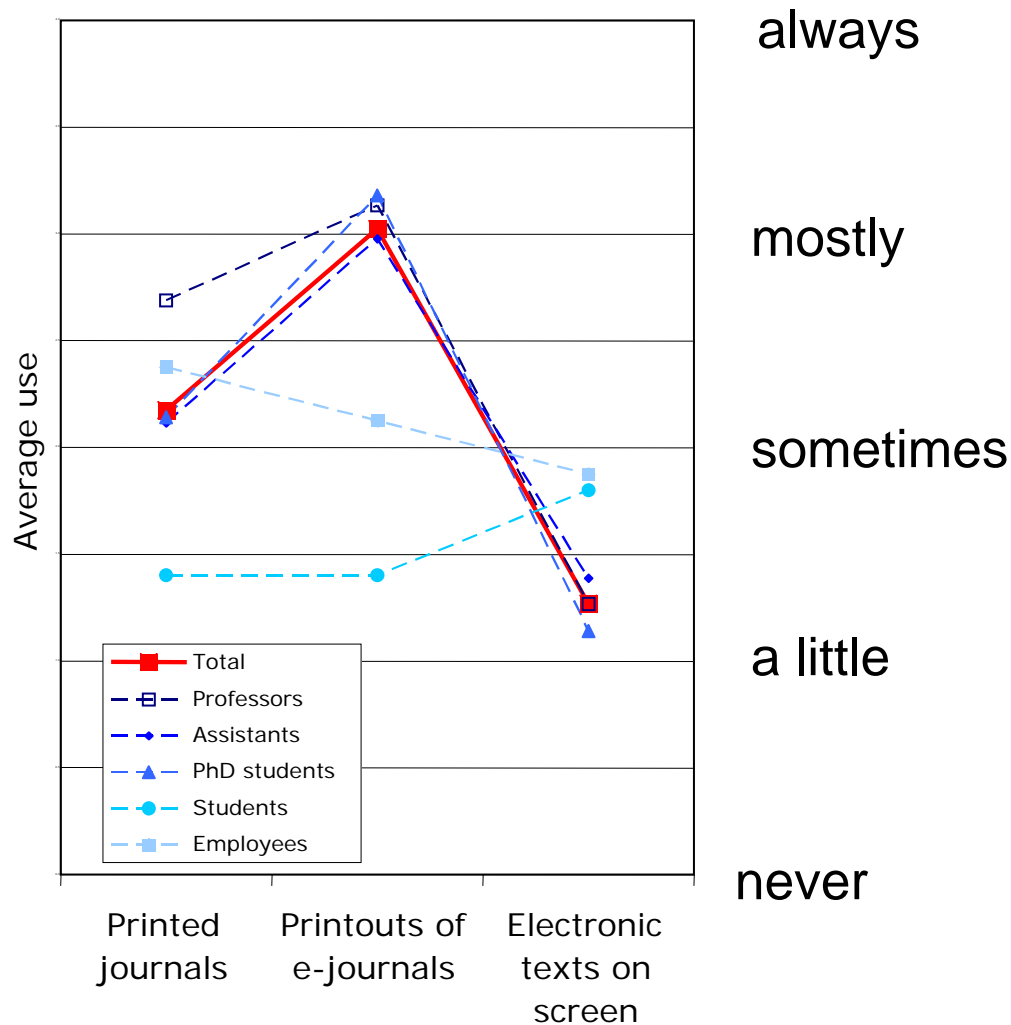

- electronic media in various forms :
Electronic library
- library services shared in a distributed environment (consortia) : Virtual library
- holdings and services integrated in uniform interface with enhanced value“

Endres, Fellner : Digitale Bibliotheken, dpunkt-Verlag (2000)

Situation at ETHZ

- ETHZ executive board decision (1999) :
One print subscription only
- Cooperative financing of e-journals by libraries
- 6000 e-journals
- 2000 chemistry/biology/ physics/
pharmacy e-journals

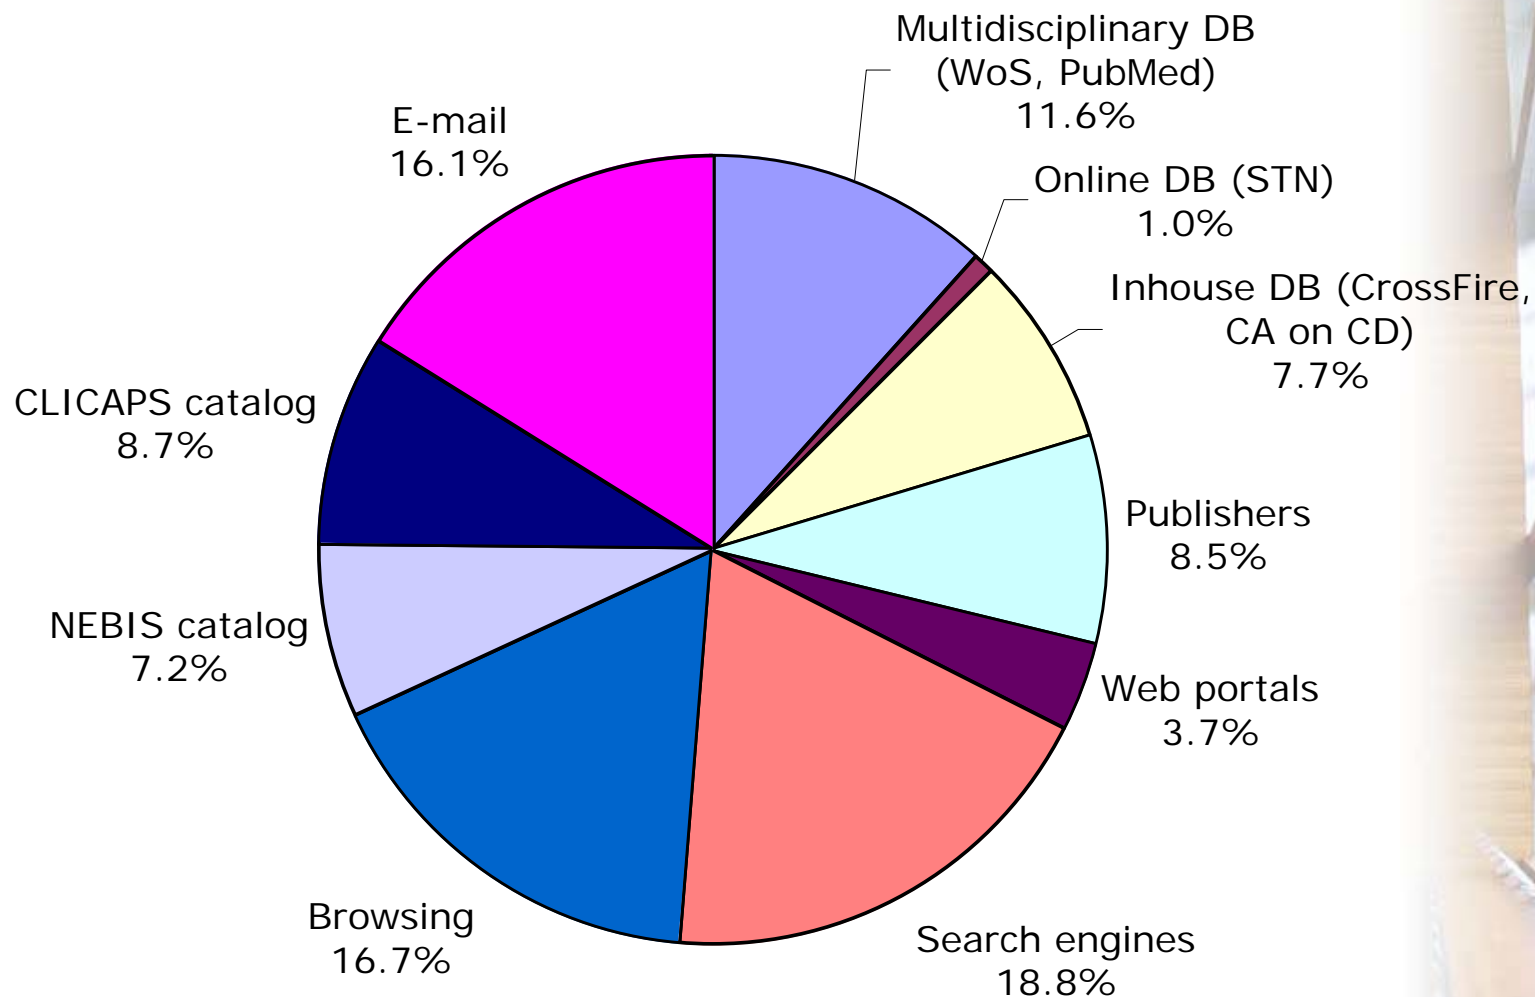

Reading habits of chemists

User Survey in Chemistry Department

- Reason : Information sources increasingly available at workbench
- Use of electronic scientific information
 - Demography: PhD students, assistants, professors, scientific employees
 - 17 question clusters
 - 178 questionnaires returned (34%)
 - Around Christmas 2001

Use of electronic search services

Based on 1335 mentions

Improving searches

Desired e-sources & e-services

Strategy

Improve quality of information use by

- Support, training, education
 - electronic media and tools
- E-services
 - subject specific
 - personalization
 - portal functions

E-education tools

- German project
„Vernetztes Studium - Chemie“
(Networks for Chemistry Education)
- BMBF/FIZ Chemie
- Basic Syllabus :
„Würzburger Modell“, Eurobachelor
- 19 Groups: 16 DE; 2 UK, 1 CH
- 9 Subject areas:
Chemical information/chemoinformatics
(Prof. J. Gasteiger, Univ. Erlangen)

„Vernetztes Studium - Chemie“

- Modular (VLU)
- XML
- Meta information
- Chemical information
 - ~3000 objects: text, images, links, multimedia
 - Basic, source, problem modules

C O N S P H Any

For Help, press F1 Shift+Click: Replace Atom/Bond

© MDL Information Systems GmbH

Beachten Sie, dass wir darauf verzichtet haben, H-Atome zu zeichnen, da diese von der Suchsoftware bei einer solchen Struktur automatisch angenommen werden ("alle freien Valenzen werden mit H aufgefüllt").

Das explizite Zeichnen von H-Atomen bedeutet nicht

E-services :

Architecture of a virtual library

- Dynamic content
- Personalization
- Linking and interfacing
- Meta information
- Federated searching

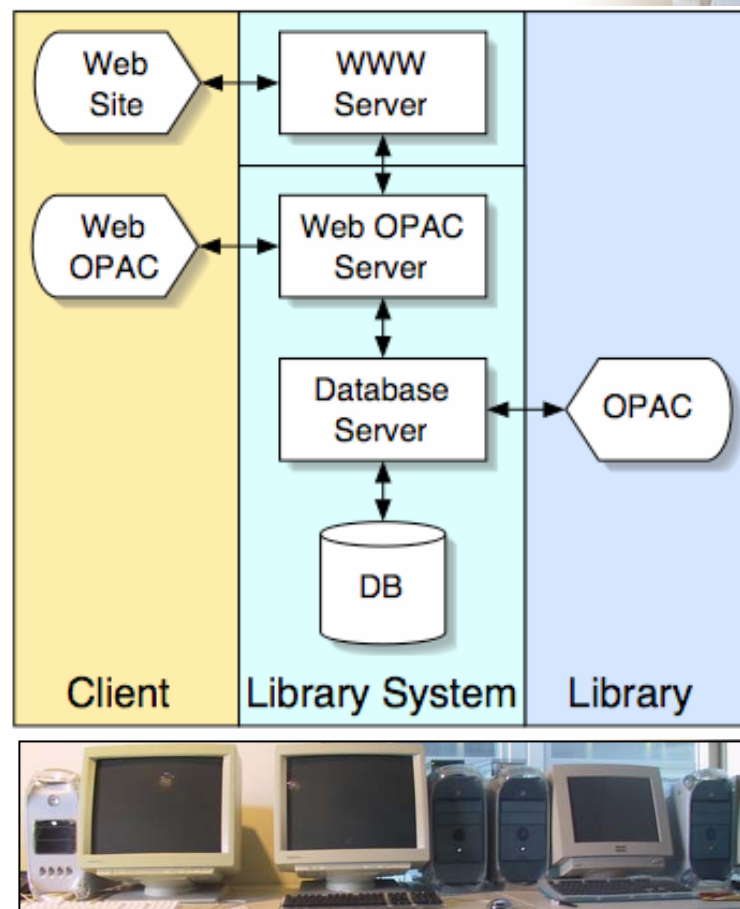

Dynamic content

- Must be input once into databases :
Formalization
- Managed independently
- Control of workflow :
Publication - Expiration - Archive
- Selection, classification :
Same data, different views
- Consistent usability
- Additional functionality for users :
Personalization, rating

Dynamic content : Architecture

- Library information systems as data back-end
- e.g., CLICAPS
 - Standard library functions
 - Added functions

Dynamic content : Example e-journals

Online journals

[Deutsch](#) [Home](#) > [Online journals](#)

About 1800 online journals covering the subjects of biology, chemistry, pharmacy and physics are available to you.

The online journals are licensed by the ETH library. The Chemistry Biology Information Center contributes about SFr. 300'000.- to the total annual subscription.

Linking and interfaces

Reference linking

- Important part of virtual library
- e.g., Vertical linking
2^o - 1^o lit.
- Chemistry : also data linking (XML, CML)

Citation	
Document Type	Journal
Authors	Corey, E. J.; Roberts, Bryan E.
CODEN	JACSAT
Journal Title	<u>J.Amer.Chem.Soc.</u>
Language Code	EN
(Series) Volume	119
Number	51
Publication Year	1997
Page	12425 - 12431

Abstract

Title Total Synthesis of Dysidiolide

Journal of
**The American
Chemical Society**

Select Decade Select Volume Select Iss
1998-1999 1997/Vol 119 Iss. 51/6

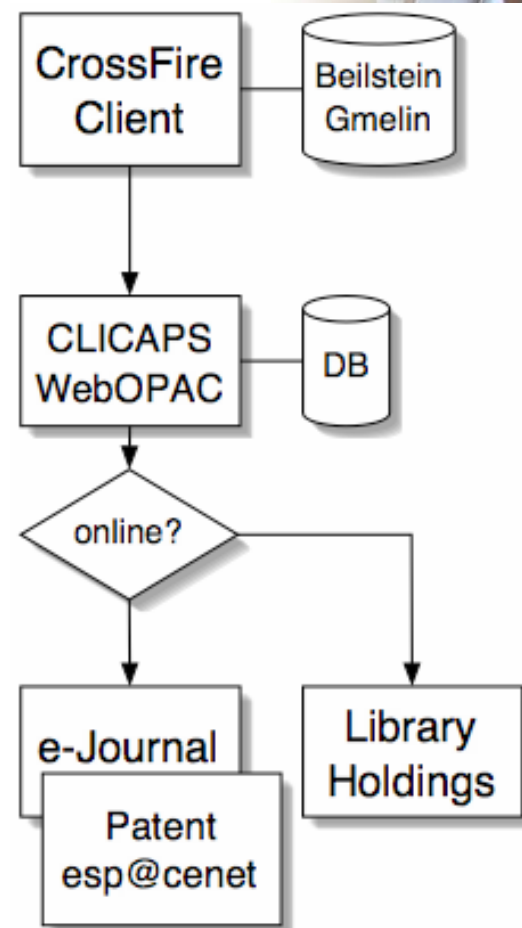

Journal of the American Chemical Society is the world's most advances in all areas of chemical research.

Results: Search techniques

very often

sometimes

never

- Most often author/title searches
- Chemistry specific search techniques rare

Problems encountered when doing searches

- Rephrasing the query: 71%
- Too much information: 65%
- Uncertain, if results contain all relevant information: 62%
- Hard digging-through to the right document: 52%
- Use is too complicated: 15%
